RESTRICTION/ELECTION

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 – 32, 35-59 and 82-102, drawn to an apparatus and method for liquid distillation, classified in class 203, subclass 24.
- II. Claim 33, drawn to a flip-filter module, classified in class 210, subclass 108.
- III. Claim 34 drawn to a multi-line heat exchanger classified in class 165, subclass 104.13.
- IV. Claims 60-69, drawn to a backpressure regulator, classified in class 137, subclass 81.1.
- V. Claims 70—81, drawn to a method and apparatus for removing contaminants from water by means of a thermal cycle engine, classified in class 60, subclass 273.

The inventions are distinct, each from the other because:

The inventions are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions are not disclosed as capable of use together. The liquid distillation method and apparatus of Group I invention is not related to the filter of Group II, to the heat exchanger of Group III, to the regulator of Group IV and/or to the thermal cycle engine of Group V and vice versa in designs, modes of operation, and effects. The

inventions or groups of inventions are not also linked as to form a single general inventive concept. As evidence, see for example, the different embodiments of the inventions as described at page 2, lines 15-30 through page 3, lines 1-23 of the instant specification.

Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
